

# Services for Young Children

## Childcare Services and Fees Data Collection

---

### **Calling All Childcare Providers!**

We would like your help please in updating and improving the quality of information that we provide Hampshire families in order to help them choose their childcare and Early Years Education services.

We therefore like you to take part in a data exercise in order to collect from you information about your childcare offer to parents including opening hours, availability, fees or charges.

Services for Young Children are also in the process of implementing new software for the collection and management of service data. The information collected will be used to update the new system, complete annual childcare cost surveys and (where consent has been given) will be published on the Hampshire Family Information Directory ([www.fid.hants.gov.uk](http://www.fid.hants.gov.uk)) from September 2016.

Here is the link to the data collection exercise:
